

Since the Launch of [Government Spending Watch](#) , there has been a large amount of interest from a multitude of organisations from CSOs to INGOs/IFIs. Recently, both [Save the Children](#) (You will need Java to watch the session) and the [Open Knowledge Foundation](#) have asked DFI to conduct webinar sessions to facilitate dissemination of the project throughout their organisation. The webinars have focused in particular on introducing the initiative; providing walkthroughs of the website and data, the methodology and also practical uses of the data. Another session for the [Global Campaign for Education](#) is to be held in the next few months. As these events were extremely well received, DFI is happy to provide other organisations with webinar sessions. Contact us at gsw@development-finance.org for further information.
