

DFI helped to facilitate an Oxfam Southern Africa workshop which aimed at designing programmes to achieve fiscal justice at regional and national levels. DFI presented on global, regional and national trends in tax policies, budget financing (aid and debt), and spending policies, and assisted Malawi, South Africa, Zambia and Zimbabwe to identify their priorities for future country and regional work. Among the key priorities emerging were a regional index on fiscal justice and inequality, incidence analysis, tax incentives, gender budgeting, and extractives revenue-sharing.
