

To evaluate long-term debt sustainability, debt strategy analysis needs to be conducted within a macroeconomic context, with 20 years of projections for a baseline and alternative optimistic or pessimistic scenarios for GDP, balance of payments and the budget. For a practical guide on how to do this, please see [Best Practices in Macroeconomic Forecasting: Key Issues for Discussion](#)

To help governments prepare baseline and alternative scenarios, DFI has developed detailed [training materials and manuals](#), conducted [research and analysis](#) and provides [advisory services](#)
